PromarkerD Enhanced Report

PromarkerD Test Results

Prognostic **16** indicates a **moderate risk** of decline in kidney function.*

* As defined by incident diabetic kidney disease (eGFR <60mL/min/1.73m²) in the next four years. Note: If eGFR level at the time of the test is already <60mL/min/1.73m², then the risk of a further decline in kidney function is defined as an eGFR decline ≥30% in the next four years.

Biomarkers

Marker	Result	Units	Reference Range
Apolipoprotein A4	26.6	mcg/mL	3.0 - 100.0
CD5 Antigen-Like	4.0	mcg/mL	0.8 - 7.0
Insulin-Like GFBP 3	12.7	mcg/mL	0.8 - 9.3
HDL Cholesterol	44.1	mg/dL	>39
Creatinine	1.2	mg/dL	0.6 - 1.30
CKD-EPI Creat eGFR	47.7	mL/min/BSA	>59

Interpretive Information

Interpretive comments based on results appear here:

Optimize lifestyle factors. Consider switching to renoprotective antihyperglycemic medication. Recommend increased monitoring frequency (6 months) and review of glycemic and blood pressure targets.
